

Assessment: Exercise 1.1

Outcomes Variables

Loops

Decision making

Assessor T. Mkwaira

- This assessment does not count for marks
- This assessment will not be marked.
- It is strongly recommended but not compulsory to submit it.

COMPLETE THE FOLLOWING TASKS:

1. Write a program to check whether a given number is negative, positive or zero.
2. Use a loop to display the numbers in the range 0...20 that are multiples of 3. A **multiple** is the product result of one number multiplied by another number. For example, the first five multiples of 4 are 4,8,12,16 and 20.
3. Write a JavaScript loop that will iterate from 0 to 15. For each iteration, it will check if the current number is odd or even, and display a message to the console
4. Write a JavaScript program that displays numbers from 1 to 10 except 6 and 9
