

Assessment: Exercise 2.2

Outcomes Functions
 Logic
 Arrays

Assessor T. Mkwaira

- This assessment does not count for marks
- This assessment will not be marked.
- You are required to submit this assessment on MS Teams.
- Use literal values in code.

COMPLETE THE FOLLOWING TASKS:

1. Given the following representation of a matrix, write a program that selects off and even numbers. The program must make use of a function that takes three arguments: The matrix array, another array called odds, and another array called evens. Save the odd numbers and the even numbers in the respective array. Finally, print the contents of the arrays in the console.

19, 23, 29

23, 15, 7

11, 13, 17

2. Without using the length property, create a program that counts the number of items in an array.
